

Security Incident Audit: INC-001

Generated on 2026-08-19 17:40:32 UTC | Automated Incident Analysis

Incident Title:	Database Credential Abuse	Severity:	Critical
Calculated Risk Score:	88 / 100	Incident Status:	Investigating
Attacker Vector:	185.190.140.23 (Netherlands)	Orchestration State:	Simulated Autonomous Playbook

AI Threat Reasoning & Incident Summary

Autonomous investigation suggests a correlated threat vector labeled 'Database Credential Abuse'. Currently in 'Investigating' status with a calculated risk index of 88/100. The incident links 5 active security alert(s) across EDR and network sensors. Automated containment procedures are ready to run.

Observed Incident Timeline

Time (UTC)	Correlated Event Description
10:12:00	Anomalous database login attempt
10:15:00	LSASS registry dumping pattern detected
11:17:23	Correlated Alert: Brute Force Password Guessing (Severity: High) from AD-PRIMARY-CONTROLLER
11:17:23	Simulated Response: 'Disable User' executed by Alex Mercer (analyst).
11:17:23	Simulated Response: 'Disable User' executed by Alex Mercer (analyst).
11:18:23	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:19:38	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:20:54	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:22:09	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:23:24	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:24:39	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:25:54	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:27:09	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
11:28:25	Simulated Response: 'Isolate Database Instance' executed by Credential Analyst Agent.
